Flavio Micheletti

Tech Lead na Poliedro Educação
São Paulo, São Paulo, Brazil

Summary

Hello, I'm Flávio(44) I've been working in the development area since 2007.

I'm looking for remote positions.

Passionate for challenges and building things to impact society and people's lives.

Let's chat? 55 11 932 087 550

Experience

Poliedro Educação
Tech Lead
June 2021 - Present (1 year 3 months)
São José dos Campos, São Paulo, Brasil

Leading a team of 15 professionals.

I worked in the creation of new projects and migration from monolith to microservices (Kubernetes).

Kubernetes (AKS), Kustomize, Docker (Container Registries), App Service (Azure), functions, queues(ServiceBus).

I carried out the publication of a mobile application written in Flutter in Apple stores.

Acting as an Architect, designing the solutions.

Acting as DevOps, managing and configuring Azure cloud and the AzureDevops tool.

Delivering applications in record time.

Midway

Software Engineer Nodejs (Azure and AWS)

February 2020 - May 2021 (1 year 4 months)

São Paulo, Brasil

Node applications with Jest, unit tests, integration tests, a lot of TDD. Code coverage by tests (test coverage), our goal was 100% coverage.

We used both AWS and Azure Cloud, including AzureDevops.

Creation of Lambdas applications in Nodejs and "dockerized" applications. We use REST Full and GraphQL

In the Azure cloud I mainly used: Azure Functions (lambdas), Azure APIM (api-gateway), Application Insights and Azure Event Hub (queues).

Acting lightly as DevOps and as an Architect. I designed an event-based solution using queues and functions in Azure.

In our Technical Forum, I had the opportunity to speak about TDD to the company's team.

I also spoke about Service Bus, the Azure message queue.

Using Jira, Confluence, Slack and Teams. I worked in teams using Kanban and Scrum.

Iterative;

Tech Lead (Azure)

September 2019 - February 2020 (6 months)

São Paulo e Região, Brasil

I worked on creating a Java application on the backend and Angular 8 on the frontend.

I led a team of 3 seniors on the backend and 4 seniors on the frontend.

We use Waterfall methodology, GitFlow, Azure DevOps, Postgres and AWS (Beanstalk).

I had the opportunity to speak to the company's developers at a Techour event on TDD. See publications...

Indra

Systems Analyst Nodejs and Java (AWS)

December 2018 - August 2019 (9 months)

São Paulo, São Paulo

Indra is a consultancy, they allocated me to another company.

In the Veloe project, I worked with Node and AWS (Amazon), Lambda, DynamoDB and Microservices. I had a very remarkable experience with the Agile methodology (Scrum).

In the Safra bank project, I worked as a backend developer in Node and Mobile with Angularjs (Ionic).

It was my first contact with mobile development.

Also at Indra, I had the opportunity to speak about TDD to the team of developers at Banco Carrefour.

DOM Brasil Diagnósticos

Tech Lead Python, Nodejs and PHP

June 2008 - December 2018 (10 years 7 months)

Vila Olímpia

I started at this company as a Junior, got promoted to Analyst, then to Senior and finished as Tech Lead.

By 2009 I already had a team to lead.

We started the project in PHP, years later we switched to Python. We wrote something in Nodejs as well.

In 2013 I fell in love with TDD.

As a development methodology, we used XP (Extreme Programming)

Volkswagen do Brasil

Internship Software Development
January 2007 - December 2007 (1 year)
São Paulo e Região, Brasil

This was my first job in the IT field (I had worked before, but in other areas).

I joined as an intern.

I developed a software by myself that was widely used by the engineering department.

Education

USCS - Universidade Municipal de São Caetano do Sul
Pós Graduação, Arquitetura e Desenvolvimento de Software · (2019 - 2020)

Fatec - Faculdade de Tecnologia SCS
Segurança da Informação, Tecnologia da Informação · (2008 - 2011)

Etec Lauro Gomes
Técnico em Informática, Tecnologia da Informação · (2006 - 2007)
