

Experience

Senior Software Engineer

Midway, January 2023 - Present (3 years)

- Development and evolution of scalable backend services using Node.js (TypeScript) and Python (FastAPI, Flask) in an event-driven architecture (Kafka).
- Design of data pipelines and workflow orchestration using Apache Airflow, ensuring scalability and reliability.
- Occasional contributions to front-end applications using React and Vue.js.

Tech: Python, FastAPI, Flask, Kafka, Airflow, Node.js, TypeScript, MongoDB, AWS, Docker, Microservices, GitLab, Azure DevOps, CI/CD, React, Vue.js.

Tech Lead

Polyhedron Education, January 2018 - December 2022 (5 years)

- Built and led a software engineering team (~15 developers), hiring and mentoring junior developers into productive team members.
- Led migration from monolithic systems to microservices architecture using Docker and Kubernetes, improving scalability and maintainability.
- Reduced dependency on external consultancies by internalizing technical capabilities and establishing engineering best practices.
- Defined and implemented CI/CD pipelines and Agile practices, improving delivery speed and team productivity.

Tech: Python, Node.js, Docker, Kubernetes, PostgreSQL, SQL Server, Azure, CI/CD, Agile, Microservices

Senior Software Engineer

Midway, January 2013 - December 2017 (5 years)

- Designed and built backend systems using Node.js, including microservices, serverless functions, and a BFF layer with GraphQL.
- Implemented event-driven architecture using messaging systems (Azure Service Bus, AWS SQS/SNS), improving scalability and resilience.
- Built and maintained CI/CD pipelines and cloud infrastructure across AWS and Azure.
- Promoted strong TDD practices with high test coverage, improving code quality and system reliability.

Tech: Node.js, TypeScript, GraphQL, Microservices, Serverless, AWS (Lambda, SQS, SNS), Azure (Service Bus, Functions), DynamoDB, Cosmos DB, CI/CD.

FLÁVIO MICHELETTI - Senior Backend Engineer

Tech Lead

DOM Brasil Diagnósticos, January 2008 - December 2012 (5 years)

- Grew from junior developer to Tech Lead, taking ownership of the full software development lifecycle
- Designed and built web applications and REST APIs from scratch, integrating with external partners
- Led technical decisions including architecture, security, and system design
- Worked closely with business teams to deliver high-impact features with strong focus on user experience

Tech: Python (Django, Flask), PHP (Slim), JavaScript, MySQL, REST APIs, MVC, TDD, MySQL.

Software Development Intern

Volkswagen from Brazil, January 2007 - December 2007 (1 year)

- Developed an internal application independently, supporting engineering processes
- Demonstrated strong ownership, autonomy, and problem-solving in a corporate environment
- Delivered a complete solution from design to implementation with minimal supervision

Tech: PHP, MySQL, JavaScript, MVC, CSS, Bootstrap, MVC, data modeling, UI/UX.

Education

USCS - Universidade Municipal de São Caetano do Sul
Master MBA, Software Architecture and Development · (2019 - 2020)

Fatec - Faculdade de Tecnologia SCS
Bachelor's, Computer and Information Systems Security/Information Assurance · (2008 - 2011)

Etec Lauro Gomes
Associates (technical course), Computer Engineering Technology/Technician · (2006 - 2007)
